Characteristics

- Premium roll-up material – grey back, 98% opacity
- Anti-reflective, matt, bright-white front surface
- Optimum ink adhesion, fast drying
- Scratch and water resistant
- Antistatic treatment avoids attracting dust and slipping in the printer
- Stiff, perfect flatness

Applications

- Roll-up displays

Post Printing Information for Latex & Solvent Inks:

As with all filmic media, this product must be allowed to "Gas-out" after printing. This can be achieved by leaving the prints face up, ideally for 24 hours, to set and harden the unique scratch resistant properties. If unable to do this e.g. with a long print run, after printing the roll stand it vertically and loosely unwind as much as possible, to allow air in and gases out.
