

## EXPERT 85WPP – 85g/m<sup>2</sup> Matt white permanent sticker on paper release liner

Expert 85WPP is a 85g/m<sup>2</sup> matt aqueous coated polyester film, with a permanent pressure sensitive adhesive laminated to a 140gsm kraft paper release liner. The construction is optimised for dry toner print applications.

## Physical characteristics

| Propertyt                            | Typical Value  | Unit    | Test Method           |
|--------------------------------------|----------------|---------|-----------------------|
| Total Thickness                      | 202 +/- 6      | μ       | Electronic micrometer |
| Weight                               | 236 +/- 6      | gsm     | Internal method       |
| Face Film Thickness (no<br>adhesive) | 60 +/- 2       | μ       | Electronic micrometer |
| Liner Thickness                      | 132 +/- 4      | μ       | Electronic micrometer |
| Gloss 60°                            | <4             | %       | BYK Gardner           |
| Opacity                              | >96            | %       | TAPPI T519            |
| Tensile Strength (Face)              | MD 14<br>TD 15 | KgF/mm2 | ASTM D882-83          |
| Melting Point                        | 250            | °C      | ASTM E794-85          |
| Adhesive Peel on<br>Stainless Steel  | >12            | N/25mm  | FINAT 1 (30min dwell) |
| Adhesive Application<br>Temperature  | + 5 to + 50    | °C      | Internal method       |
| Adhesive Service<br>Temperature      | -20 to +60     | °C      | Internal method       |

| Availabilit                   | y Sheets/Pack   |  |  |
|-------------------------------|---|--|--|
| A4                            | 100/500   |  |  |
| A3                            | 100/250   |  |  |
| SRA3                          | 100/250   |  |  |
| <b>Recommended conditions</b> |   |  |  |
| For use                       | 10°C – 30°C, 40% -<br>55% RH  |  |  |
| For storage                   | 10°C – 20°C, 20% -<br>55% RH  |  |  |
| Shelf life                    | 24 months after delivery<br>(under recommended<br>storage conditions) |  |  |

## Compatibility

Suitable for most thermal transfer and dry toner (laser/LED/flash fusion) print processes, both mono and colour small-volume, mid-volume & production machines. On such machines the user must establish for themselves the optimum settings and paper path, being aware of the thickness and weight of the material. The printable surface is also suitable for screen print, offset litho (using only fully oxidising inks).

## Applications and characteristics:

- ✓ Tear resistant, high stability, water resistant front face.
- $\checkmark\,$  Ideal for signage and rugged labelling.
- ✓ Matt surface promotes toner adhesion and smoothest imaging on a wide range of toner based printers.
- ✓ High grab, high-tack permanent acrylic pressure sensitive adhesive for long duration.
- ✓ Heavy weight stabilised paper liner, suitable for long print runs from production to low-to medium- speed printers.
